

## BRAIN HEALTH RESOURCES (updated 1/2021)

It is common as we age to be concerned about maintaining our memory and thinking abilities. Here we include important information and local resources. Recent research emphasizes the negative impact of isolation, therefore staying engaged through lectures, volunteer activities, reading, and involvement in hobbies you enjoy--with groups of people you enjoy--is encouraged.

The Cleveland Clinic [6 Pillars of Brain Health](#) provides a helpful framework for individuals and caregivers to examine issues that promote one's brain health:

- Food and Nutrition
- Medical Health
- Mental Fitness
- Physical Exercise
- Sleep and Relaxation
- Social Interaction

The USC Verdugo Hills Hospital's Community Resource Center for Aging can be reached by telephone at 818.949.4033 to discuss opportunities and assist in narrowing in on steps right for you. While we cannot endorse these resources, they may help you explore new and accessible offerings available for little to no cost.

Services and Supports	
Agency Name	Services Offered
<b>Administration for Community Living</b>  Website: <a href="#">Brain Health: You Can Make a Difference!</a>	Addresses topics including: brain health basics, impacts of medicines on cognitive health, brain injury, and dementia.
